2. Methodology Completeness (73.3% compliance)	[Medium Priority]
3. Results Quality (75.0% compliance)	[Low Priority]

Detailed Feedback

Structure Evaluation

- Structural sequencing anomalies detected: sections out of order -> abstract, methodology, results, methodology
- Abstract exceeds structural limits (326 words, ideal: 150-250)
- Introduction is shorter than ideal range (326 words, ideal: 400-800)
- Methodology is shorter than ideal range (137 words, ideal: 400-1000)
- Results is shorter than ideal range (295 words, ideal: 300-800)
- Excellent structural alignment: All mandatory structural sections are correctly accounted for.
- Clean contextual boundaries verified. No text-contamination or structural leak patterns detected.

Reviewer Summary

The manuscript achieved an aggregated evaluation score of 73.94/100, resulting in a grade of 'B' and an automated reviewer verdict of 'Minor Revision'. To significantly elevate the paper's quality, the authors should prioritize addressing shortcomings in Structure & Completeness and Methodology Completeness. Overall, the foundational research framework is robust and requires only refined adjustments prior to formal submission.
